

DON'T LOSE YOUR SIGNAL

Maximize the reliability of your signal speed and quality with DuraLife® by Radix

Radix DuraLife 2-Hour Fire Resistive Cables offer **Industry Leading Signal Performance** supported by the lowest capacitance and the highest twists per foot available in the market today.

With your life safety systems, make sure you are using the highest performing circuit integrity cables:

	Capacitance (pF/FT)	Twists/FT	Resistance (OHMS/1000')
Radix DuraLife 16/2 Unshielded	15.3 pF/FT	3	3.99
Other Silicone Based CI Cable	27 pF/FT	2.5	4.02
Mineral Insulated Cable (MI)	53 pF/FT	4	4.09

*Representative Samples

Radix leads the market by offering the most options to meet mandatory pathway survivability requirements for critical emergency circuits in high-rises, hospitals, transit and tunnels, and other critical facilities.
