

700C/600V to 1000C/300V

MCS FURNACE CABLE

HIGH-TEMPERATURE LEAD WIRE

RATINGS / APPROVALS

700°C – 600 Volt

1000°C – 300 Volt

Passes the IEEE-383 (modified) 210,000 BTU/hr Vertical Cable Tray Flame Test

Passes UL VW-I Vertical Flame Test

Passes CSA FTI Vertical Flame Test

**ISO 9001:2000
CERTIFIED**

CONSTRUCTION

Conductors

18 AWG – 8 AWG

Solid or stranded A nickel

Class K (18 AWG – 10 AWG) per ASTM B-174

Class H (8 AWG – 4 AWG) per ASTM B-173

Insulating Construction

High quality reinforced mica tape

Conductor Covering

Ceramic fiber braid coated with a high temperature finish

(Optional) Outer Braid

Stainless steel (Not recommended for applications exceeding 700°C)

CHARACTERISTICS

- Superior high temperature and oxidation resistance in normal temperatures to 1000°C
- Fire resistant
- Very low smoke emission when burned at rated temperature
- Resistant to many chemicals
- Maintains circuit integrity even when exposed to conditions of high ambient temperature and flame
- Optional stainless steel braid provides mechanical protection
- If wire is subjected to very rapid rise in temperature the binder in the construction can ignite but will quickly extinguish. The resulting white ash is non-conductive

APPLICATION

- For use in non-flexing applications.
- Wiring for ovens, kilns, and furnaces
- Where the normal installation environment includes continuous operating temperatures up to 1000°C and intermittent temperatures approaching 1200°C
- Not recommended for outdoor use
